

# Weekly Disease Surveillance Report

## 2022 Reporting Week 32: August 7- August 13

This weekly report is produced by the DOH-Okaloosa Epidemiology Section to provide situational awareness to community partners. Data is subject to change as additional information is gathered.

### MONKEYPOX (MPX)

The CDC urges healthcare providers to be vigilant for patients presenting to your facility with a characteristic MPX rash, which can resemble and coexist with sexually transmitted infections (STIs). It is important to become familiar with identification and be prepared for specimen collection.

MPX testing is available through commercial laboratories, including Labcorp, Quest, Mayo Clinic, Aegis, Johns Hopkins, and Sonic Health, etc. Please follow established testing requirements for each laboratory. Approval for testing is NOT required from the Department of Health (DOH) if testing through a commercial laboratory.

If UNINSURED patients need MPX testing, please contact DOH-Okaloosa at 850-833-9065 for consultation. The state laboratory will receive specimens for uninsured patients that meet specific criteria and are approved for testing by the DOH. Approval for testing is required from the DOH if testing through the state laboratory and is based on clinical presentation, exposure history, and timeline.

# Influenza-Like Illness

Week 32: August 7 - August 13

Influenza-like Illness (ILI) is defined as fever greater than or equal to 100°F AND cough and/or sore throat in the absence of another known cause.

**Figure 2:** Annual comparison of the percent of all hospital ED visits due to ILI for Okaloosa county for the 2018-19, 2019-20, 2020-21, and 2021-22 influenza seasons by week. Data source: ESSENCE

**ANALYSIS:** During Week 32, flu reporting partners and ESSENCE (a syndromic surveillance system) reported an increase in ILI activity for Okaloosa County. The percentage of ILI ED visits in Okaloosa County increased from 2.86% during Week 31 to 3.17% during Week 32. Flu partners reported no positive rapid flu tests this week. Over the past three weeks, 3 out of 126 influenza specimens submitted to the state lab were positive (3 Influenza B unspecified). There were no ILI admissions, outbreaks, or deaths reported by flu partners this week. The percentage of total ILI ED visits for Week 32 is lower than that of Week 32 last year.

*Note:* Other respiratory syndromes can be represented by increased ILI case numbers. Data Source: ESSENCE
